

TorQ — Parts & Cost Split

Ordered September 15, 2026 · Amazon · all prices include tax and shipping

Total paid	\$496.21	People in the split	Each person pays
Voucher	– \$250.00	3	\$82.07
		4	\$61.55
Left to split	\$246.21	5	\$49.24

I've paid for everything up front — send me your share when you can.

Why the Pi is on here

I couldn't find my spare Raspberry Pi, so I had to buy one. The Pi 5 kit was \$174.90 before tax — the biggest single line in the order. It does come with its own cooler, SD card and power supply, so we don't need to buy those separately. If my old Pi turns up, it goes in the shared parts pile too.

What we bought

Order	Arriving	What's in it	Paid
Main order	Arriving Sun, Sep 20	• Raspberry Pi 5 4GB kit (Pi, Active Cooler, 32GB SD card, 27W power supply) • Track motors (12V 100 RPM) · 10 MG90S servos · PCA9685 servo driver • ELEGOO UNO R3 · Arduino Motor Shield Rev3 • 2 LiPo batteries (2200mAh 3S) · XT60 connectors · 12V→5V USB-C converter · XL4015 converters (3) • 2 OLED displays · USB speaker · M3 screw kit (810 pc)	\$399.51
Belly screen	Sep 25 – Oct 6	• Waveshare 5in DSI touchscreen, 720×1280	\$55.99
Screen cable	Sep 29 – Oct 7	• Waveshare Pi 5 display cable, 300mm	\$13.17
LiPo charger	Sep 23 – 25	• SUPULSE 2S–3S balance charger	\$13.93
Eye lenses	Sep 30 – Oct 8	• 32mm plano-convex glass lenses (5-pack)	\$13.61
Total			\$496.21

Not included: filament for printing the body, and the USB camera (already have it).

At the end: splitting up the parts

Everything here is shared. When the project's done, we divvy the parts up fairly between everyone who chipped in:

- **Take turns picking** — draft order, reversing each round, so nobody gets stuck with last pick every time.
- **Big-ticket items** (the Pi kit ~\$175, the screen ~\$51) — if more than one person wants one, whoever takes it evens up with the others in cash or gives up picks.
- **Spares go in the pile too** — we bought extras: 3 MG90S servos, a second LiPo, 2 XL4015 converters, a spare OLED, 3 lenses, and most of the M3 kit.
- **Anything broken or used up** during the build just comes off the list — no one owes for it.
